Being asked to speak to co-workers about supporting an issue, or doing something that helps our union can be nerve-wracking. Wouldn't it be great if there were an easy formula anyone could follow to help them successfully navigate these conversations? Luckily, there is—it's called AHUY, and it will give you the structure and the confidence you need to hold conversations that move your co-workers to action. Join us, learn the method, and then bring it back to your local to expand the number of people having one-to-one conversations about issues important to your local.

Many workers in educational and health care settings suffer from burn-out, stress, PTSD, anxiety, and depression. This seminar will explore this concept and how identifying the root causes of the workplace environment is an organizational tool to advocate for better working conditions. Attendees will receive handouts. Group participation encouraged.

18. Green Cleaning: Transition to Safer Chemicals

NYSUT members and the workforce nationwide use thousands of chemicals every day. While many of these chemicals are suspected of being harmful, only a small number are regulated in the workplace. As a result, workers suffer more than 190,000 illnesses and 50,000 deaths annually related to chemical exposures. Workplace chemical exposures have been linked to cancers, and other lung, kidney, skin, heart, stomach, brain, nerve, and reproductive diseases.

Considering safer alternatives to hazardous chemicals is not a new approach. Thinking about safer alternatives allows employers and workers to identify solutions, rather than continuing to evaluate the problem.

This workshop covers a proactive approach to reducing the use of hazardous chemicals in the workplace by transitioning to safer alternatives. Course topics include identification, evaluation, assessment, and implementation of safer chemical alternatives.

Note: *This workshop is especially applicable for professionals in custodial and maintenance, food service, paraeducators, security skilled trades and transportation.*
